gl. Asset Management

Bogdan Zgersky Biography

Bogdan Zgersky joined GL Asset Management in 2014. He brings 18 years of professional experience. Bogdan is responsible for managing assets by implementing unique methods and algorithms based on a combination of trading Russian, American and European stocks and statistical arbitrage approach. He is using innovative technologies such as Deep Learning or Neural Networks to analyse and search for opportunities for our statistical arbitrage strategy exploiting data from NYSE, LSE, MOEX, XETRA, SWX. Bogdan Zgersky has gathered an excellent track record in managing mutual funds for insurance companies or private pension funds over the years.

Furthermore, he is regularly invited to speak on the radio or quoted in the media, providing his opinion and assessment of the market events. His deep knowledge of the Russian stock market (large cap mostly) has made him a leading specialist and given him the opportunity to lecture at universities or participate at numerous seminars.

Bogdan has a degree in Economics, Finance, and Credit from the Kaliningrad State Technical University and obtained a master degree in Technical management and Mechanical engineering from the Kaliningrad Technical College in Russia. He is also a keen chess player and has a special interest in cultural anthropology studies. He has been living in Zurich since 2014.
